DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-41 drawn to a film

Group II claim(s) 42-55 and 90-107, drawn to an optical waveguide.

Group III, claim(s) 56-89 and 108-129, drawn to a method of forming a waveguide.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is drawn to a film comprising a polymer matrix, monomer, catalyst, and other components, capable of being used in various applications such as a resist film in a semiconductor manufacturing method or in other known imaging methods and applications. The optical waveguide of group II is a structure that would comprise additional materials such as a base and would be an imaged product. The method of group III comprises specific steps and procedures employed in forming a device such as an optical waveguide, however, would be classified separately and the waveguide of group II is not limited to being prepared solely by the method of group III. It is noted that Group II claims 101 and 102 are dependent upon and have further dependent claims drawn to a waveguide, however it appears that a typographical error has those claims drawn to a film. Given that the linked claims are drawn to the waveguide product, it appears that the preamble of those claims should be the product. A similar situation involves group III claims 120 and 121, which should clearly be drawn to a method for similar reasons.

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of

the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
